July FUN FACTS

#1 It was in July that the rabies vaccine was first successfully given to a patient. The French microbiologist Louis Pasteur administered the vaccine to a nine-year-old called Joseph Meister on July 6, 1885. The child had been bitten by a rabid dog, and Louis Pasteur, unsure whether the vaccine would be successful, decided it was worth testing. Fortunately for the boy, it worked!

#2 Around 150 million hot dogs are consumed on Fourth of July. It is estimated that \$6.78 billion will be spent on food this year reported by the National Retail Federation (NRF).
